Head Start & Early Head Start Programs

Head Start is Early Head Start that serves pregnant women and their families, infants, and toddlers under age three. It is designed to support the health and development of young children. This is achieved through various programs that focus on the holistic well-being of children and families. The programs are tailored to meet the unique needs of each family and child, ensuring that they receive the support they need to thrive.

Here are some key aspects of Head Start:

1. The program includes a range of services such as health, nutrition, and family support.
2. It provides educational activities that encourage learning and development.
3. Parent involvement is a core component, with families actively participating in their child's education.
4. The program is inclusive, serving all children, regardless of their background or abilities.
5. It offers a variety of services to support families, including transportation and childcare.
7. The program is continuously evaluated and improved to better serve the needs of children and families.

Head Start in Action:

- A child is seen engaging in an educational activity, demonstrating the program's commitment to learning.
- A parent is involved in a meeting, highlighting the importance of family involvement.
- A teacher is providing support, showing the program's dedication to early childhood education.

Head Start’s Success:

- The program has a strong track record of helping children and families achieve their goals.
- It has been shown to have a lasting positive impact on children's development.
- Families report increased confidence in their ability to care for their children.

Overall, Head Start is a comprehensive and effective program that supports the early development of children and their families.
