

**WE  
BRING  
HOPE**

HOPE the Bus and HOPE on Wheels are two state-of-the-art vehicles that we transformed to bring learning experiences to families across LA County. We are wheelchair accessible and kids of all abilities are welcome.

We carefully follow the Los Angeles County Department of Public Health's recommendations for physical distancing, sanitizing, protective gear, and frequent hand-washing.

HOPE the Bus is funded by the Administration for Children and Families, Department of Health and Human Services. HOPE on Wheels is funded by the California Department of Education.

## **HOPE on Wheels & HOPE the Bus**

**Two ways  
to bring early  
education  
services to  
families across  
LA County!**

**Los Angeles County  
Office of Education**

**HOPE**  
opens doors to  
early learning  
opportunities!

Where children  
can learn,  
there is **HOPE**.

This is  
what **HOPE**  
can do.

**E**arly education services for young children are desperately needed in LA County, especially for children with disabilities and families with limited or no income. That's why we challenged ourselves to develop innovative ways to create a "we-come-to-you" method that improves children's access to these critical programs.

With HOPE on Wheels, we can bring services directly to children at regional centers and Early Head Start sites across Los Angeles County, and that's how we are changing the game.

#### **Home Visitation Space:**

Besides supporting Head Start learning programs, HOPE the Bus is an alternative location for home visits for families, including those experiencing homelessness who live in hotels or places with a "no-visitor" policy.

#### **Recruitment/Outreach Space:**

Both HOPE buses can be transformed into recruitment/outreach centers at events across LA County to give children and families an up-close look at what Head Start has to offer.

Together we can get children ready to enter kindergarten.

**N**ot only can HOPE the Bus assist in providing a space for early learning activities, it's also a place for exams like vision and hearing, meeting with parents, parent education, and other services.

Our mobile services deliver the same Head Start quality found at any of our locations, by highly trained staff who are committed to helping children enter kindergarten ready to succeed in school and life.
